

Ericsson Customer Testimonial

Ericsson, the world's leading provider of technology and services to telecom operators, as well as the market leader in 2G and 3G mobile technologies, supplies communications services and manages networks that serve more than 250 million subscribers globally.

MRI China Group was given the opportunity to support Ericsson - Greater China in recruiting their Head of Sourcing - China. The search project was carried out by Tom van der Heyden, MRI's Senior Telecommunication's Practice manager and his team, working with Ericsson's Human Resources team, led by Jane Tan, Vice President – Human Resources.

“The MRI team went beyond typical service levels to provide Ericsson with everything needed to ensure that we were getting the best candidates available for consideration.” states Tan.

After a thorough search process, and having exhausted internal and external possibilities, Ericsson decided to hire the MRI candidate of choice, as the best match, considering experience and chemistry, for this demanding role. The candidate joined Ericsson last December.
